ASPECT flew 2 flights on 8 Sept 2017. Flight 22 focused on State of Texas targets in the Beaumont, Port Arthur, and Orange area. This flight consisted of:

Targets = 21
Flight Lines = 26

All lines and targets were collected.

The second flight (flight 23) consisted of specific tanks in facilities ranging from Mont Belview down to Freeport. The flight consisted of:

Mont Belview Targets = 11
Flight lines = 2

Tank Survey Targets = 16
Flight lines = 10

All lines and targets were collected.

All data will be pulled this afternoon and fully processed. The team continues to work on a sensor problem and has been able to reproduce the fault on the ground. It is forecasted that this sensor (actually the recording computer) will be fully operational by 2100 today.

The target deck for 9 Sept 2017 will consist of Zone 9 and/or any other special targets requested by the Region.

A summary of chemical detections is attached.
